

ATTENTION BUSINESS OWNERS & NEIGHBORS

Vehicle GPS & DriveCam provide photos and help Police recover vehicle within 5 minutes!

Pictured here is the Car Thief who took our 2007 van on Sunday at 13:48 from the alley way at 3760 Wheeling St #6.

The black SUV was used as the getaway vehicle in the theft of the Van. The SUV might be driven by "Randy" as the person stated this in the video clip captured on the Van's DriveCam.

If your NEWER model vehicle is stolen, chances are that the vehicle will only be moved a short distance. These experienced thieves have knowledge of LO-JACK or another GPS enabled vehicle tracking device which may be in the vehicle. They will simply park the vehicle down the street or behind a building and WAIT to see if it gets recovered. If the Police do not recover the vehicle, then they simply return with stolen plates and drive off or will strip the vehicle from the new location at night.

They took our Van less than .5 miles from our garage and parked it behind this building on Revere Street in Denver.

If you see this Black SUV/"Randy" or person caught driving our van pictured above call:
